CASE STUDY

HealthStats NSW

Agency: [HealthStats NSW](#)

HealthStats NSW is an interactive, web-based application that allows users to freely access data and tailor reports about the health of the New South Wales population. It provides information on:

- the health status of the NSW population
- health inequalities and the determinants of health
- the major causes of disease and injury and current health challenges
- trends in health and comparisons between age groups and geographic locations.

The data in HealthStats NSW cover a range of health risk factors, diseases, locations, and specific populations.

FIND data easily using keyword search or topic and location browsers.

ACCESS local data for a better understanding of your Local Health District, Local Government Area, or Primary Health Network, and see how it compares to others.

EXPLORE those data for different groups within the population, such as Aboriginal people, or by gender or age.

UNDERSTAND the data using the definitions, methods, disease codes, commentaries and associated information.

TRACK trends over time to inform more proactive, needs-based planning.

DOWNLOAD customised or standard printable reports, or raw data for your own analysis.

HealthStats NSW is available at <http://www.healthstats.nsw.gov.au/>

NSW Health takes privacy seriously. For information on how privacy obligations in the release of data are met see: <http://www.health.nsw.gov.au/hsnsw/Publications/privacy-small-numbers.pdf>
